[removed.txt](#)
[coc tower private well samples.pdf](#)
[sampling data sheet.pdf](#)

Good Afternoon Julie,

Thank you for all of your work coordinating this project.

The Burman private well was sampled on Tuesday and the Poitra private well was sampled this morning. Samples were delivered to REI around lunchtime. Attached are a scanned copy of the COC and the sample data sheets.

Sampling Plan Questions/Comments: (some of these may be bob questions)

- 1) Tribal Groundwater Standards are attached. I didn't see them referenced.
- 2) Is Cadmium being analyzed? This was found in the deep VAS samples completed by Weston.
- 3) On page 3 *"The Tribe also met with Region 5 and the Wisconsin LUST Program on February 6, 2014 to ask that the state reopen the site and assess lingering contamination. The decision to re-open is pending."*

Clarification:

The Tribe has never asked to the State to re-open the case. The Tribe has requested assistance and an EPA lead response to the contamination. EPA has provided information to the State. The Tribe was present at two WDNR state closure meetings (February 6th 2014 and September 29th 2014) to witness the meeting and offer technical information on Tribal Findings.

Happy Thanksgiving!

Kristen Hanson

Subject: Tower Standard additional tap water sampling

Hi Kristen,

I was great to talk with you! And thank you again for offering to collect the additional 2 tap water samples for us.

Attached are the approved work plan, the sample data collection sheet, and the sample forms Matt filled out (as examples on the data to be collected). The last sample Matt collected was identified as "Tower-06-1114". Please label the additional samples sequentially, starting with sample ID "Tower-07-1114". Please also collect a field duplicate sample from one of the two wells, and label sequentially. See the 3rd sample data sheet in the pdf called 11-13-14 field sheets from Matt for an example of where to put the field duplicate ID.

Besides the YSI you will need a turbidimeter to measure turbidity as it is one of the stability parameters.

Hi Matt,

What's the status of the sample coolers you will/have shipped to Kristen?

The samples made it to the lab in good condition. Thanks!

All - please feel free to contact me at any time (except before 8 am WL time (that's 5 am here in Anchorage!).

Thanks

Julie Sharp-Dahl
